

Dear Sir/Madam,

Pilot Test on Digital Signing for all SGXNET Users

Following our email of 29 April 2005 regarding the implementation of the digital signature feature for SGXNET, we would like to invite all SGXNET users to participate in a pilot test to familiarise themselves with this new feature. (Please refer to attached addendum to the SGXNET Guide on Digital Signing.)

We have scheduled the pilot test from 18 July 2005 to 19 August 2005 and the Test Site within SGXNET will be updated with the digital feature from 18 July 2005. It is important that you send test announcements via the Test Site during this period to familiarise yourselves and ensure your readiness for the new feature.

The implementation of the digital signature feature is planned for September 2005 and we will inform you of the actual implementation date in due course.

Installation of New Software to your System

Before you can proceed with the pilot test, you need to install the Sun Java software in your computer. The Sun Java software, which is available at the URL: <http://java.sun.com/j2se/1.5.0/download.jsp>, is used to initiate the signing applet during digital signing process. For the procedure on installing the software, please refer to the attached installation guide.

Enquires

For assistance on matters relating to SGXNET, please contact:
